

**“Transilvania”
Technical College**
Baia Mare, Romania

Background

"Transilvania" Technical College was founded in 1972, in Baia Mare, Maramureș county, in the North of Romania, as a technological high school of 4 classes studying mechanics, and in a short period of time it reached a number of 2700 students.

After 1990 the management of the school decided to diversify the domains of study for students, facilitating them a better access to the labor market and also the possibility to continue their studies in universities.

“Transilvania” Technical College - today

- 650 students learn nowadays in our college
- 45 teachers devote their time and knowledge to teach a wide range of subjects
- we have classes of high school education, vocational education and adult education, all of them on technological subjects

- 
- The following specializations are available for our students: Food industry, Tourism and catering, Banqueting, Aesthetics and hygiene, Hairdressing, Natural resources and environmental protection, Mechanics, etc.
 - The high school has 50 cabinets, laboratories, classrooms, workshops, a big library, an amphitheater, two gyms, a boarding school and a canteen.
